

## CLINICAL TRIAL NEWSLETTER

18 August 2015 / Issue 6

### Onward and Upward

Enrollment in the SOLSTICE trial is now 86% complete per tumor count. We remain on track to complete the trial by year end. Top enrolling centers in July (each with 2 new subjects) were:

#### Institut Bergonié

Jean Palussière, MD / Xaviere Buy, MD  
Laurence Virmoux (coordinator)

#### Mayo Clinic (Rochester)

Matt Callstrom, MD PhD / David Woodrum MD, PhD  
Connie Sathre (coordinator)

#### NYP/Weill Cornell Medical Center

Bradley Pua, MD  
Jamie Stern (coordinator)

#### Rhode Island Hospital

Damian Dupuy, MD / Peter Littrup, MD / Terrance Healey, MD  
Liz Morrell, Sue Foley (coordinators)

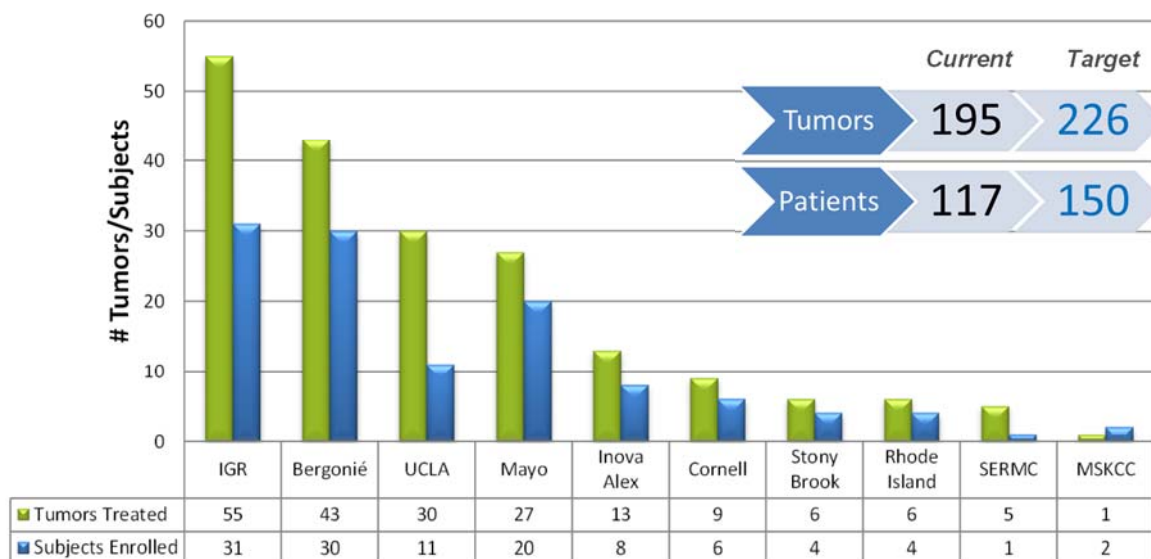

### Meet our French CRAs

Barbara Van Marrewijk (Bordeaux) and Laurence Alves (Noisiel, near Paris) play a critical role in monitoring and managing the two SOLSTICE sites in France. High enrollment has kept these two experienced monitors very busy. Merci pour vos dur travail!

### Enrollment / Tumors (as of 18 Aug 2015)

## Trivia

Wilhelm Conrad Röntgen, a German physicist, won the first Nobel Prize for physics in 1901.

1. What did he discover?
2. What body part was the first 'röntgenogram' taken of?
3. When did he die and from what?

### Answers

1. x-rays
2. *His wife's hand (Anna Berta Ludwig) with her ring. She then exclaimed "I have seen my death!"*
3. *10 Feb 1923 from carcinoma of the intestines*

## Procedure Date CRF

Please note it is important to enter the Procedure Date CRF into the database as soon as the last cryoablation procedure has been performed on the enrolled index tumor(s). This form sets the follow-up visit windows dates at the top scheduled visit table in the database. It has been noted that if the Month 1 Follow-up CRF is entered before the Procedure Date CRF, the visit may incorrectly appear out of window as indicated by the icon in the table. If this occurs, it can be corrected by re-saving the form after the Procedure Date CRF is entered.

## Retreatment Follow-up

Subjects who receive additional Galil Medical cryoablation to an index tumor continue to be followed. The retreated tumor begins on a new follow-up schedule. If for some reason, the tumor undergoes imaging out of window, on the Deviation CRF, please choose "Other, specify" on the visit interval and in the text field below, type in "# month re-treatment visit, tumor #R".
